

ILLEGITIMATE DUPLICATION PREVENTING METHOD, DATA
PROCESSING APPARATUS AND MEDICAL IMAGING APPARATUS

5 ABSTRACT OF THE DISCLOSURE

In order to assuredly prevent illegitimate duplication of a program by a simple technique, license information 304 is created as information in the form of a run-time read module in a data processing apparatus by a creation program that self-destructs after being executed, and a program 10 300 that is installed without the license information and is incomplete without the license information is executed with the license information 304 read during the execution.
